

Water Reclamation Facility Operator III

*Class specifications are intended to present a descriptive list of the range of duties performed by employees in the class. Specifications are **not** intended to reflect all duties performed within the job.*

SUMMARY DESCRIPTION

Under direction of the Wastewater Treatment Plant Supervisor, supervises, assigns, reviews, and participates in the work of staff responsible for wastewater operations maintenance and repair activities on an assigned shift of the City's wastewater treatment plant and collection activities; ensures work quality and adherence to established policies and procedures; and performs the more technical and complex tasks relative to assigned area of responsibility.

IDENTIFYING CHARACTERISTICS

The Water Reclamation Facility Operator III class is the first level supervisory position in the City's wastewater treatment system. The Water Reclamation Facility Operator III is responsible for the operations, maintenance, and repair of the City's wastewater plant equipment and system and supervision of assigned operations staff. The incumbent in this full supervisory level position is distinguished from the Wastewater Treatment Plant Supervisor in that the Supervisor level has the daily responsibility for the systems operation whereas the Water Reclamation Facility Operator III is responsible for an assigned shift or activity.

REPRESENTATIVE DUTIES

The following duties are typical for this classification. Incumbents may not perform all of the listed duties and/or may be required to perform additional or different duties from those set forth below to address business needs and changing business practices.

1. Plans, prioritizes, assigns, supervises, reviews, and participates in the work of staff responsible for wastewater operations maintenance and repair activities on an assigned shift of the City's wastewater treatment plant and collection activities.
