Construction Waste Management Plan

Per the 2022 California Green Building Code, a minimum of **65% of construction** and demolition waste generated on site must be recycled and/or salvaged for reuse. *California Green Code, Section 4.408.2, 4.408.3, 4.408.4 (Residential) and Section 5.408.1.1, 5.408.1.2 or 5.408.1.3 (Commercial).*

Project Address: _____ **Permit Number:** _____

The following permit is being applied for (select one):

- ☐ New Residential or Commercial Construction.
- ☐ Residential Remodel/Addition that will result in an increased conditioned area, volume, and/or overall size.
- ☐ Commercial Improvement/Addition that will result in 1,000 sq ft of new building and/or projects with a valuation of \$200,000+.
- ☐ Demolition projects with a valuation of \$10,000+.

The following method will be used to meet this requirement (select one):

- ☐ **Construction waste management plan:** I will submit a construction waste management plan and keep all weight-tickets and receipts.
- ☐ **Waste management company:** I will utilize El Dorado Disposal, the City of Placerville's approved Certified Waste Management company. El Dorado Disposal will provide me with verifiable documentation of the percentage of construction and demolition waste material diverted from the landfill.
- ☐ **Waste stream reduction alternative:** This project will generate a total combined weight of construction and demolition waste disposal into landfill, which does not exceed 2 lbs. per sq ft of new or altered building area, for High Rise Residential and Commercial projects. Low Rise Residential shall not exceed 3.4 lbs. per sq ft of new or altered building area. I will provide weight slips/materials salvaged showing compliance not exceeding the pounds per sq ft. (new construction only)

ACKNOWLEDGEMENT & VERIFICATION

1. I will put forth a good faith effort to ensure that a minimum of 65% of the debris from this project will be reused, recycled, or salvaged.
2. I will collect and save all landfill and recycling center weight-tickets and receipts from this project.
3. I will submit a Final Report with weight-tickets and receipts before or at final inspection.
4. I understand failure to complete the Waste Management Plan requirements may prevent the final inspection and delay the Certificate of Occupancy for new construction.
5. To the best of my knowledge, the information provided on this form is true and correct.

I have read, understand, and take responsibility for this project's compliance with CALGreen regulations and the terms and conditions of this Waste Management Plan.

CONSTRUCTION WASTE MANAGEMENT PLAN: PRE-CONSTRUCTION ESTIMATES

Project Address: _____ **Permit Number:** _____

Complete this table to identify the types of waste materials and estimated quantities that will be reused, recycled, or disposed of from your project site. Please note if estimates are in tons or pounds.

Waste Material Type	Disposal Method /Quantity			Total
	Salvaged or reused	Recycled	Disposal or non-recyclable	
Asphalt / Concrete				
Shotcrete				
Metals				
Wood				
Rigid Insulation				
Fiberglass Insulation				
Gypsum Drywall				
Carpet/Carpet Pad				
Plastic				
Hardiplank Material				
Glass				
Cardboard				
Pallets				
Job Trash				
Electronics				
Other:				
Totals:				

How will the construction and demolition waste material be sorted (select one):

- ☐ (Sorted on-site) I plan on using Waste Management bins for all materials and will provide all receipts after construction.
- ☐ (Bulk mixed – comingled & sorted off-site) I plan on using one container for all materials, sending the mixed C&D debris to a Certified Recycling Facility, and will provide all receipts after construction.

Recycling Facility to receive debris: _____

Provide construction methods that will be used to reduce the amount of waste generated (select all that apply):

- ☐ Efficient Design ☐ Panelized or prefabricated construction
- ☐ Careful and accurate material ordering ☐ Other: _____
- ☐ Careful material handling and storage

Confirm the method of waste tracking on this project (select one): ☐ WEIGHT ☐ VOLUME

CONSTRUCTION WASTE MANAGEMENT PLAN: FINAL REPORT

Project Address: _____ Permit Number: _____

This form is due before or at final inspection.

Complete this table to identify the types of waste materials and quantities that were reused, recycled, or disposed of from the project site. Please note if values are in tons or pounds.

Waste Material Type	Disposal Method /Quantity			Total (A+B+C)
	Salvaged or reused (A)	Recycled (B)	Disposal or non-recyclable (C)	
Asphalt / Concrete				
Shotcrete				
Metals				
Wood				
Rigid Insulation				
Fiberglass Insulation				
Gypsum Drywall				
Carpet/Carpet Pad				
Plastic				
Hardiplank Material				
Glass				
Cardboard				
Pallets				
Job Trash				
Electronics				
Other:				
Totals:				
(TOTAL COLUMN A + TOTAL COLUMN B) / TOTAL = TOTAL DIVERSION				%

ACKNOWLEDGEMENT & VERIFICATION

1. I have attached all weight-tickets and receipts from this project.
2. I certify that the above information is true and correct and that I have complied with CALGreen regulations relating to construction and demolition debris.
