The work for which this Proposal is submitted is for the construction in accordance with these Contract Documents (including the payment of not less than the State general prevailing wage rates or Federal minimum wage rates set forth herein), the Project Plans described below, including any addenda thereto, the Contract annexed hereto, and also in accordance with the California Department of Transportation Standard Plans and Standard Specifications, and the Labor Surcharge and Equipment Rental Rates in effect on the date the work is accomplished, and in accordance with the General Prevailing Wage rates. Bids are to be submitted for the entire work, including additive alternates, if any. The amount of the bid for comparison purposes will be the total of all the base and optional bid items.

The Bidder shall set forth for each unit basis item of work a unit price and a total for the item, and for each lump sum item a total for the item, all in clearly legible figures in the respective spaces provided for this purpose. In the case of unit basis items, the amount set forth under the "Item Total" column shall be the product of the unit price bid and the estimate quantity for the item.

In case of discrepancy between the item price and the total set forth for a unit basis item, the unit price shall prevail, except as provided in (a) or (b), as follows:

- (a) If the amount set forth as a unit price is unreadable or otherwise unclear, or is omitted, or is the same as the amount as the entry in the item total column, then the amount set forth in the total column for the item shall prevail and shall be divided by the estimate quantity for the item and the price thus obtained shall be the unit price.
- (b) (Decimal Errors) If the product of the entered unit price and the estimated quantity is exactly off by a factor of ten, one hundred, etc., or one-tenth, or one-hundredth, etc., from the entered total, the discrepancy will be resolved by using the entered unit price or item total, whichever most closely approximates percentage wise the unit price or item total in the Department's Final Estimate of Cost.

If this Proposal is accepted and the undersigned Bidder shall fail to enter into the Contract and furnish the two bonds in the sums required by the State Contract Act, with surety satisfaction to the City of Placerville within eight days, not including Sundays and legal holidays, after the bidder has received notice from the City of Placerville that the Contract has been awarded, the City of Placerville may, at its option, determine that the Bidder has abandoned the Contract, and thereupon this Proposal and the acceptance thereof shall be null and void and the forfeiture of such security accompanying this Proposal shall operate and the same shall be the property of the City of Placerville.

The following changes are made to the Notice to Bidders, Proposal, Special Provisions and Project Plans Project Plans:

Notice to Bidders

Replace the paragraph in the Completion of Work section in the Notice to Bidders with the following:

COMPLETION OF WORK: Paving operations are anticipated to occur at night from the hours of 10 pm to 8 am, Sunday through Thursday. Concrete and utility work is anticipated to occur during normal working hours from 7 am to 5 pm, Monday through Friday. No work shall be performed by the Contractor on Friday nights, Saturday, or City designated holidays.

Proposal

Questions and Answers

The City received the following questions:

Question 1: What items are included in the *Connect to Existing Water System* bid item?

City's response to Question 1: Refer to paged SP-46 – SP-47 of the Special Provisions for details on what is included in the *Connect to Existing Water System* bid item.

Question 2: After review of the outfall of the 36" UV CIPP Liner, it appears outfall is towards the middle of the culvert. A 36" UV liner is very heavy and has to be pulled in, due to the location of the outfall this is going to make the install extremely difficult with the weight of the liner and the bends that would need to be negotiated for install. Can a

manhole be added to the project and placed just before the bridge and the last portion of the 36" Liner be made into two segments?

City's response to Question 2: A manhole has been added to the plans on revised sheet C23.

Question 3: Can you provide depths of the Manholes for the UV CIPP Liner?

City's response to Question 3: Refer to plan sheet revisions for sheet C23, below and attached, for manhole and inlet depths.

Question 4: Special Provisions Page SP-31 62-2.02A Summary Paragraph 3 - States that "The minimum thickness for the UV Liner Shall be shown as on the contract documents." There are no minimum thickness's in the documents, please provide any minimum thickness requirements.

City's response to Question 4: Thickness for the UV liner shall be calculated using ASTM F1216 Standard Practice for Rehabilitation of Existing Pipelines and Conduits by the Inversion and Curing of a Resin-Impregnated Tube or ASTM F1743 Standard Practice for Rehabilitation of Existing Pipelines and Conduits by Pulled-in-Place Installation of Cured-in-Place Thermosetting Resin Pipe (CIPP).

Question 5: Please provide physical property requirements for the UV CIPP Liner.

City's response to Question 5: At a minimum, the pipe lining shall have the following physical properties:

Polyester Resin	ASTM Test	Initial Values psi (MPa)
Flexural Strength	D790	4,500 (31)
Flexural Modulus	D790	250,000 (1,710)
Tensile Strength	D638	3,000 (20.5)
Vinyl-Ester Resin	ASTM Test	Initial Values psi (MPa)
Flexural Strength	D790	5,000 (34.5)
Flexural Modulus	D790	300,000 (2,050)
Tensile Strength	D638	4,000 (27.5)

Initial Values are determined by ASTM D638 and D790.
