Bids are to be submitted for the entire work. The amount of the bid for comparison purposes will be the total of all the items.

The Bidder shall set forth for each unit basis item of work a unit price and a total for the item, and for each lump sum item a total for the item, all in clearly legible figures in the respective spaces provided for this purpose. Questions and Answers

The City received the following questions:

Question 1: There are no bid items for permanent pavement delineations. It seems all pavement delineations will be done on Broadway Maintenance contract. If so, can the striping plans be removed from the Broadway Sidewalks project?

City's response to Question 1: Depending on the sequence of work, temporary pavement markings and temporary traffic stripe shown in the Broadway Sidewalks plans may not be necessary. City encourages the Contractor to coordinate with Contractor for the Broadway Maintenance project to minimize the need for temporary pavement markings and temporary traffic stripes.

Question 2: What items are included in the *Connect to Existing Water System* bid item?

City's response to Question 2: Refer to page SP-44 of the Special Provisions for details on what is included in the *Connect to Existing Water System* bid item.

Project Plans

The following sheets of the original Project Plans have been modified as follows:

- Sheet C04: Revised pipe zone bedding materials for both water and storm drain. Pipe zone backfill shall be $\frac{3}{4}$ inch Class II AB.
- Sheet C09: Modified Construction Note 6. The City has already replaced the damaged fire hydrant at Station 26+53, in front of 1270 Broadway. This hydrant should be reconnected to the main as indicated in the image and revised Special Provisions (below):
