

WESTERN PLACERVILLE INTERCHANGES PHASE 2 PROJECT

CIP # 41828

PUBLIC SAFETY ANNOUNCEMENT

May 9, 2019

Hi Everyone!

This is a friendly reminder to the public to please respect the equipment and access restrictions in and around the Western Placerville Interchange Phase 2 Construction Site, especially the intersection closure at Forni Road and Ray Lawyer Drive. Access for the public and trail users is temporarily restricted to Forni Road at Main Street. Any access outside of the designation of Forni Road is part of an active construction site and is unsafe for public access. Please do not approach or climb on equipment. Please do not trespass onto this site, it's illegal, and more importantly, it's dangerous. Trespassing on a construction site is considered a misdemeanor and those found trespassing will be cited.

Additionally, the contractor retains ownership of all materials on the project until the project is fully accepted by the City and this includes materials. Removal of such materials is considered theft and is a felony. Those found stealing materials from the site will be arrested.

Please continue to observe construction signage as you travel around the construction area.

Thank you for your cooperation!
