

## Placerville Drive Bicycle and Pedestrian Facilities Project

### Project Description

The City of Placerville proposes to improve and increase bicycle and pedestrian interconnectivity within the City along Placerville Drive and Green Valley Road.

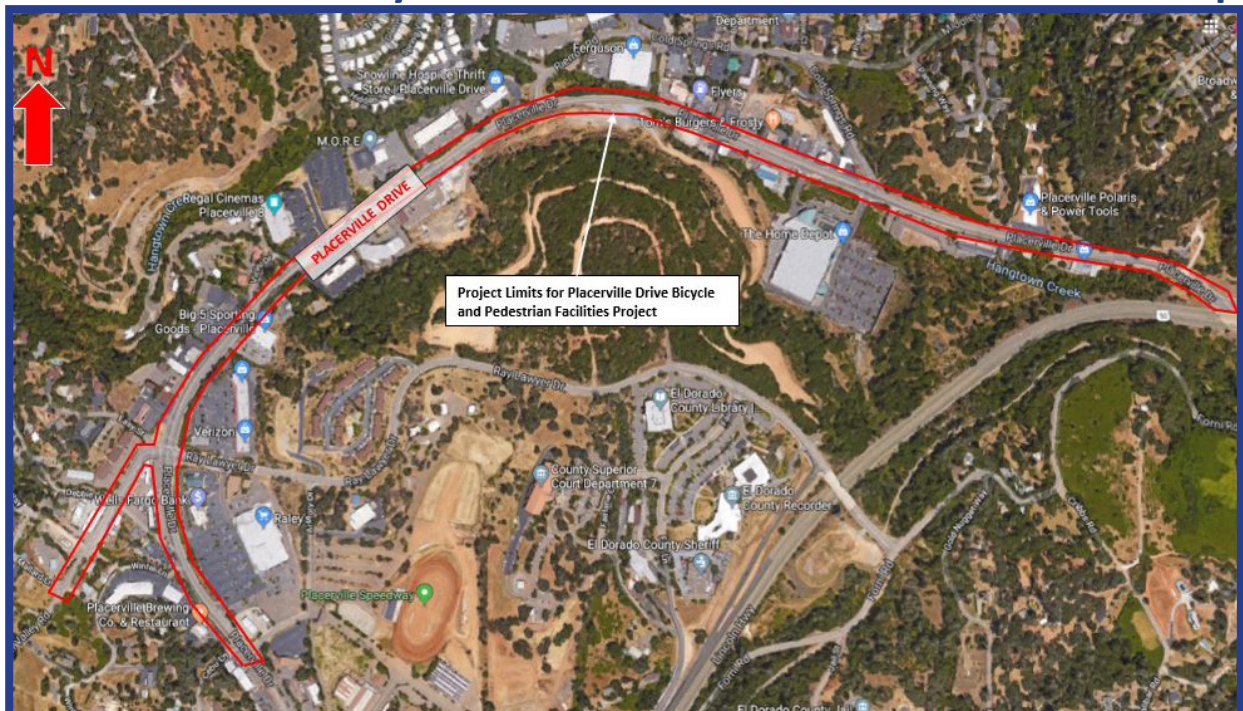

The Placerville Drive corridor is a major, mixed-use corridor with housing, major employment centers, and significant retail outlets. The existing roadway has discontinuous sidewalks and limited Class II bike lanes throughout its length.

The proposed project will establish continuous sidewalk and bicycle facilities along both sides of Placerville Drive from Armory Drive to the Highway 50 Undercrossing, and will establish sidewalk facilities along the north side of Green Valley Road between Placerville Drive and Mallard Lane.

Design features of this project will include:

- Five-foot-wide sidewalks
- Class II or Class IV Bicycle Lanes
- ADA Access Ramps
- Curb and Gutter
- Additional Drainage Improvements

# Placerville Drive Bicycle and Pedestrian Facilities Project

## Funding and Environmental Compliance

The proposed project is funded through federal Congestion Mitigation and Air Quality (CMAQ) funds; therefore, the proposed project must result in air quality benefits including but not limited to reduced Vehicle Miles Traveled, increased bicycle and pedestrian interconnectivity, and increased transit services and access to bus stops. The current CMAQ funding is for environmental documentation, design plans and documents, and construction for a portion of the project. Additional funding to complete construction of the entire project has yet to be identified.

## Project Timeline

## Community Input Encouraged

The City of Placerville is committed to keeping the public informed and involved with this project. We encourage you to contact the City Project Manager, Melissa McConnell with any questions or input:
