HOLIDAY SEASON MORATORIUM FOR CONSTRUCTION PROJECTS

In an effort to reduce traffic congestion during the holiday season, the City of Placerville restricts construction on City streets during a holiday season moratorium period. Unless specifically approved by the City Engineering Department, all construction and maintenance projects on the attached list of streets shall be terminated during the holiday season. **The holiday season moratorium begins the Monday before Thanksgiving Day and ends on January 2nd.**

Unless otherwise approved, no encroachments on to City streets or sidewalk, cuts, or trenching will be allowed during this period on the listed streets. All existing street work shall be back filled and paved in advance of the start of the holiday moratorium. All barricades and barriers shall be removed from all travel lanes.

Emergency repairs will be permitted during this holiday period; however, all such repairs shall be reported to the City Engineering Department, 3101 Center St., 3rd Floor, Placerville, CA 95667, telephone (530) 642-5250, within one hour of the determined need. If an emergency arises during the City's non-working hours, notification to the above office shall be made before 9:00 a.m. of the following work day.

Those requesting to work during the holiday moratorium must submit a formal request in writing to the City Engineering Office prior to the moratorium. Requests should be submitted as soon as possible so that cumulative impacts of projects can be assessed. The request must include a traffic control plan that describes location, work proposed, work times, and public right-of-way required.

If you have any questions, please call the City Engineering Office at (530) 642-5250. Your cooperation during this special period is appreciated.

HOLIDAY SEASON CONSTRUCTION MORATORIUM STREETS

Broadway
Main Street

All other streets will be on a case by case basis

City of Placerville
**Request to Work in City Right-of-Way
During the Holiday Moratorium**

Contractors whose work may infringe on public right-of-way or impact vehicular or pedestrian traffic during the holiday moratorium are **required to submit this completed form and a traffic control plan** with the form. This form may also be attached to the respective Encroachment Permit Application Package. No work shall be performed until said traffic control plan has been approved.

The traffic control plan shall be neat, legible. In addition to vehicular traffic control, the plan shall address pedestrian impacts and appropriate pedestrian traffic control measures. This plan shall include the detailed location of all proposed construction area traffic control devices necessary to perform the proposed work, all proposed phases of the traffic control plan, the specific times requested to have the traffic control plan in effect, and clearly delineate what public right-of-way is being impacted.

The Director or designee may revoke or require the plan to be modified at any time.
The contractor shall conform to the requirements of the approved traffic control plan.
The approved plan must be available for inspection by the Director or designee at the work site at all times.
