

2021 Annual Water Quality Report A Consumer Confidence Report

This report contains important information about your drinking water. (Este informe contiene información muy importante sobre su agua potable. Tranúzcalo ó hable con alguien que lo entienda bien.)

The City of Placerville and El Dorado Irrigation District (EID) take pride in the quality of water delivered to their customers. This report summarizes the test results of water samples taken by EID and City staff as required by the U. S. Department of Environmental Protection and the California Department of Public Health.

Things You Should Know About Your Drinking Water ~

- ◆ **Drinking water**, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The term “contaminant” as used in this document refers to any substance in water, other than pure water itself that is regulated and monitored for health and aesthetic reasons. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the USEPA’s Safe Drinking Water Hotline (800-426-4791) or by visiting <http://www.epa.gov/safewater/>
- ◆ The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activities (see list at right).
- ◆ Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV / AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. USEPA / Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).
- ◆ In order to ensure that tap water is safe to drink, the U. S. Environmental Protection Agency (USEPA) and the California Department of Public Health (CDPH) prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. CDPH regulations also establish limits for contaminants in bottled water that must provide the same protection for public health.

Contaminants That May Be Present In Source Water ~

Microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharge, oil and gas production, mining or farming.

Pesticides and herbicides, that may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.

Organic chemical contaminants, including synthetic and volatile organic chemicals, that are byproducts of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, agricultural application, and septic systems.

Radioactive contaminants, that can be naturally-occurring or be the result of oil and gas production and mining activities.

Please be aware that the City is not responsible for plumbing and treatment devices installed on private property. Substandard, illegal, old, improperly installed and/or improperly maintained plumbing or water treatment devices installed by others may adversely affect the water quality coming from the taps inside your home or business.

Abbreviations & Definitions used in this report:

MCL – Maximum Contaminant Level: The highest level of contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs (or MCLGs) as is economically and technologically feasible. Secondary MCLs are set to protect the odor, taste, and appearance of drinking water.

MCLG – Maximum Contaminant Level Goal: Set by the USEPA, The level of a contaminant in drinking water below which there is no known or expected risk to health. State EPA goals are called PHG (Public Health Goals).

MRDL – Maximum Residual Disinfectant Level: The level of a disinfectant added for water treatment that may not be exceeded at the consumer’s tap.

MRDLG – Maximum Residual Disinfectant Level Goal: The level of a disinfectant added for water treatment below which there is no known or expected risk to health. MRDLGs are set by the U.S. Environmental Protection Agency.

ND: Not detectable at testing limit.

NTU – Nephelometric Turbidity Unit: A measure of the clarity of the water. Turbidity is a measure of the cloudiness of the water.

TT – Treatment Technique: A required process intended to reduce the level of a contaminant in drinking water.

Source Water Quality - (El Dorado Irrigation District)

| Primary Standards - Health Based (units) | Primary | MCL | PHG (MCLG) | Highest Single Measurement | Average | Level | MCL Violation? | Most Recent Sampling Date | Typical Source of Constituent |
|--------------------------------------------------------------------|-----------------------------|------------|--------------------|----------------------------|------------------------------|----------------|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| Turbidity | | | | | | | | | |
| Highest single measurement of the Treated Surface Water (NTU) | TT = 1.0 | | n/a | 0.21 | n/a | | No | 2021 | Soil runoff |
| Lowest Monthly % of Treated Surface Water Meeting NTU Requirements | TT=95% of samples ≤ 0.3 NTU | | n/a | NA | 100% | | No | 2021 | Soil runoff |
| Secondary Standards - Aesthetic (units) | Secondary MCL | PHG (MCLG) | Range of Detection | Average | Level | MCL Violation? | Most Recent Sampling Date | Typical Source of Constituent | |
| Chloride (mg/L) | 500 | n/a | 3-5 | 4.0 | | No | 2021 | Runoff/leaching from natural deposits; seawater influence | |
| Corrosivity (A.I.) | Non-corrosive | n/a | 9.1-10.0 | 9.70 | | No | 2021 | Natural or industrially-influenced balance of hydrogen, carbon and oxygen in the water; affected by temperature and other factors | |
| Odor-Threshold (units) | 3 | n/a | 0-2 | 1 | | No | 2021 | Naturally-occurring organic materials | |
| Specific Conductance (µS/cm) | 1600 | n/a | 41-71 | 54 | | No | 2021 | Substances that form ions when in water; seawater influence | |
| Sulfate (mg/L) | 500 | n/a | 0-1.7 | 0.7 | | No | 2021 | Runoff/leaching from natural deposits; industrial wastes | |
| Total Dissolved Solids (mg/L) | 1000 | n/a | 34-47 | 42 | | No | 2021 | Runoff/leaching from natural deposits | |
| Turbidity (NTU) | 5 | n/a | 0-0.12 | 0.07 | | No | 2021 | Soil Runoff | |
| Other Parameters (units) | Notification Level | PHG (MCLG) | Range of Detection | Average | Level | MCL Violation? | Most Recent Sampling Date | Typical Source of Constituent | |
| Alkalinity (mg/L) | Unregulated | n/a | 11-26 | 20 | | n/a | 2021 | No Know Typical Source of Constituent | |
| Bicarbonate (mg/L) | Unregulated | n/a | 11-26 | 20 | | n/a | 2021 | | |
| Calcium (mg/L) | Unregulated | n/a | 2-6 | 4 | | n/a | 2021 | | |
| Carbonate (mg/L) | Unregulated | n/a | 0-11 | 4 | | n/a | 2021 | | |
| Hardness as CaCO3 (mg/L) | Unregulated | n/a | 8-22 | 14 | | n/a | 2021 | | |
| Hardness as CaCO3 (grains/gal) | Unregulated | n/a | 0.47-1.29 | 0.99 | | n/a | 2021 | | |
| | | | | | | | | | |
| Magnesium (mg/L) | Unregulated | n/a | .5-1.9 | 1.1 | | n/a | 2021 | | |
| pH (pH units) | Unregulated | n/a | 7.68-8.75 | 8.09 | | n/a | 2021 | | |
| Sodium (mg/L) | Unregulated | n/a | 5.0-5.8 | 5.3 | | n/a | 2021 | | |
| | | | | | | | | | |
| Disinfection Byproduct Precursors (units) | Action | Level | PHG (MRDLG) | Range of Detection | Lowest RAA Quarterly Average | MCL Violation? | Most Recent Sampling Date | Typical Source of Constituent | |
| Total Organic Carbon [TOC] Filtered water (ug/L) | TT= Removal | | n/a | 700-2100 | n/a | n/a | 2021 | Various natural and manmade sources | |
| Total Organic Carbon [TOC] Removal Ratio (Actual/Required) | TT≤1.0 | | n/a | n/a | 1.00 | No | 2021 | Various natural and manmade sources | |

City of Placerville Distribution System Water Quality - Main System

| Microbiological Constituents (units) | Primary MCL | PHG (MCLG) | Value | | MCL Violation? | Most Recent Sampling Date | Typical Source of Constituent |
|---------------------------------------------------------------|-----------------------------------------|-------------|-----------------------------------------------------------------|--------------------------------------|----------------|---------------------------|-----------------------------------------------------------------------------------------------------------------|
| Total Coliform Bacteria > 12 Samples/Month (Present / Absent) | No more than 5% positive monthly sample | (0) | No samples were positive | | No | 2021 | Naturally present in the environment |
| | | | | | | | |
| Disinfection Byproducts and Disinfectant Residuals (units) | Primary MCL (MRDL) | PHG (MRDLG) | Range of Detection | Highest Running Annual Average (RAA) | MCL Violation? | Most Recent Sampling Date | Typical Source of Constituent |
| Chlorine [as Cl ₂] (mg/L) | (4.0) | (4) | 0.46-0.89 | 0.62 | No | 2021 | Drinking water disinfectant added for treatment |
| HAA5 [Total of five Haloacetic Acids] (ug/L) | 60 | n/a | 28.9-47.2 | 44 | No | 2021 | Byproduct of drinking water disinfection |
| TTHMs [Total of four Trihalomethanes] (ug/L) | 80 | n/a | 33-70 | 50 | No | 2021 | Byproduct of drinking water disinfection |
| | | | | | | | |
| Inorganic Constituents (units) | Action Level | PHG (MCLG) | Sampe Data | 90th % Level | MCL Violation? | Most Recent Sampling Date | Typical Source of Constituent |
| Copper (mg/L)[at the tap] | 1.3 | 0.3 | None of the 20 smaple sites collected exceeded the action level | 0.17 | No | 2020 | Internal corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives |
| Lead (ug/L)[at the tap] | 15 | 2 | None of the 20 smaple sites collected exceeded the action level | None Detected | No | 2020 | Internal corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives |
